

WORKING WITH INFLOW CORPORATION

As easy as 1-2-3...

EXPERIENCE:

- » More than 10 years in monitoring and analyzing motor driven systems for optimization with special recognition from the Department of Energy as an Energy Specialist in Fans, Pumps and Compressed Air.
- » Over 10 years experience working at one of the nations largest electric and gas utilities with vendors and customers installing energy efficient equipment at facilities like yours to increase return on investment for your projects.

HOW WE DIFFER:

- » We are experts in the government and utility rebate programs so we can maximize your return on on your investments
- » We are not generalists. We have engineers who are experts in analyzing these systems plus go beyond the mechanical room to perform a complete investigation.
- » We do not sell equipment. Our recommendations have you and your company's best interest in mind.

WHY PARTNER WITH US?

- » **Flexibility.** Prioritizing with you on which system deserves the most attention.
- » **Unbiased solutions that work.** Our vast systems experienc includes such customers as ConAgra Foods, Coca-Cola, Nissan, and Goodyear. We have performed over 300 System Evaluations throughout the United States.
- » **Transparency.** The data we collect can be used by any contractor specifying in design or equipment solutions, therefore you are not tied to any of these providers and you can shop your solutions around.
- » **Integrity.** Supply reports that show savings you can use to document your energy savings goals.
